DESTINATIONS

TEXAS INTO THE DEPTHS

Natural Bridge Caverns, about 30 miles north of San Antonio, is celebrating the 50th

anniversary of its discovery this summer with a new lantern tour in which visitors have only lanterns to light their underground exploration. Traditional tours of the caverns, offered about twice an hour, take guests 180 feet underground into large caves with winding

passages and past stone formations created by dripping water. The lantern tour is at 9 a.m. daily through Aug. 31.

SWITZERLAND GOING GREEN

Miami-based architect Chad Oppenheim and Swiss landscape architect Enzo Enea have unveiled what's being hailed as the world's first Tree Museum on the shores of Lake Zurich in Rapperswil-Jona,

about a half hour from Basel. The eco-museum features a collection of 2,000 trees on the grounds of a 14th century monastery. The trees are planted in front of large sandstone slabs, which serve to highlight each tree's unique attributes.

Details: The Tree Museum is open Monday through Saturday; admission is \$15. www.myswitzerland.com
