

The Setai Hotel

The Setai Hotel is an exclusive enclave nestled between the renowned Collins Avenue and the Atlantic coastline on Miami Beach, Florida. It is a high-rise condominium and hotel, well known as one of the best places to be in Miami.

Offering respite from the busy street life and lively beach crowd, the hotel grounds are shaded by palm groves and sheltered by thick belts of lush, soothing, deep green vegetation.

The hotel opened in 2004 and was originally designed by Jean-Michel Gathy. His vision was to create a true vacation home for visitors. The use of natural materials and tasteful decor underlying Asian aesthetics and values ensured the hotel was a great success when it first opened.

In 2010, Enea was invited to renovate the central courtyard and update the overall design of this area. Enea's renovations

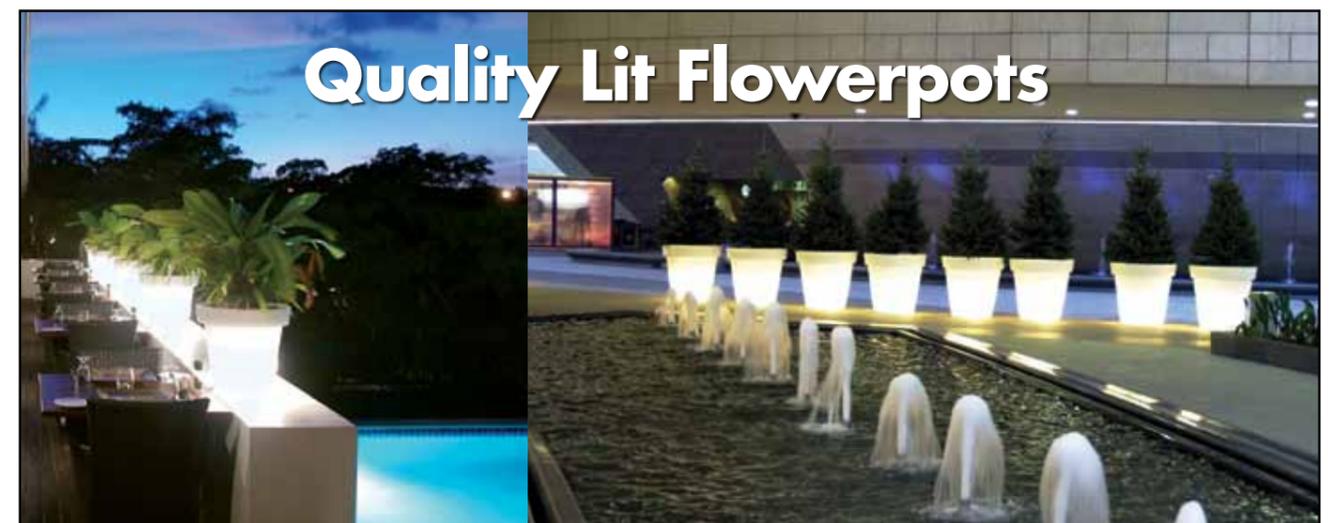

to the courtyard, with its palms, slatted pergola, and calming water feature, perfectly combine an unlikely pairing of Asian and tropical styles. Local stone together with warming woodwork carry this fusion style through to the corridor, where newly designed garden features now link the courtyard to the existing pool area. From here, the view over the ocean is perfectly framed by coconut palms and trimmed hedges.

The renovation of the pool area took place in 2013, when the hotel management decided to upgrade the surrounding gardens as well the pools, deck, furniture, lighting, and so on. The hotel has three outdoor pools that are now framed by lush green gardens with a colorful bougainvillea wall as a backdrop, in place of the plain stucco

wall that had been there previously.

Enea's overall approach was to first of all respect the original design by continuing the use of the same natural materials (especially the Florida keystone and ipê wood), while also taking into account the local climate, using plants that are mostly native to Florida and resistant to the elements, such as the salt spray and strong winds.

The renovated hotel and condominium is considered a retreat for those looking for a serene and intimate place amidst the energy of South Beach. The Setai, Miami Beach was voted "Best Hotel in Miami and Miami Beach" and "#2 Best Hotel in Florida" by readers of Condé Nast Traveler magazine in 2013, just after Enea completed the final renovations.

Bloom! is simple but classy design: a flowerpot doubling as light. Use at homes, offices, hotels, beaches or large public spaces – both indoors and outdoors. Conforms to strict European specifications. Includes energy saving light bulbs, can be coloured.

HEIGHT	DIA TOP	WEIGHT	LIGHT	BULBS	DRAIN
40 CM	44 CM	4 KG	Yes	2 x 10 watt	No
60 CM	66 CM	10 KG	Yes	2 x 11 watt	Yes
90 CM	99 CM	24 KG	Yes	2 x 18 watt	Yes

HOTEL

Enea Landscape Architecture was established in 1993, when Enzo Enea took over the garden decoration company founded by his father. Today, Enea is recognized as one of the leading landscape architectural firms in Switzerland and the rest of the world. The firm is widely known for its ability to deal with the complex design and construction of a variety of projects including private gardens and terraces, restaurants, hotels and resort environments, corporate gardens, public parks, as well as golf courses. The unique strength of the company lies in its capacity to offer its client a complete in-house service package, inclusive of the total realization and implementation of a project. Enea begins its work with the planning and construction phases, the design and installation of irrigation and lighting systems, comprehensive garden care, and finalizes each project with the furnishings of the gardens. With the employment of 150 talented and highly qualified individuals, Enea can offer its clients services that are second-to-none.

Natural irrigation water reduction with
the World's most efficient
Mineral Moisture Retaining Soil Additive.

Successfully implemented and proven in the most
challenging landscaping projects in the Gulf.
